EDUCATION

2016 - present

BAHIR DAR UNIVERSITY

- Department of Computer Science
- GPA~3.79

SKILLS

- HTML5
- CSS3
- JavaScript
- React
- Bootstrap
- Node.js
- Express
- MongoDB
- MySQL
- version control , git, and github

LANGUAGES

- Amharic - Fluent
- English - intermediate

ABOUT ME

3rd-year Computer Science student with strong skills in full-stack web development and mobile application development. Experienced in building real-world systems using technologies like Node.js, Express, React, MySQL, and MongoDB. Passionate about creating scalable applications, solving real-world problems, and continuously learning modern technologies. Currently focused on developing production-level projects, and I am open to job opportunities related to my profile.

PROJECTS AND EXPRIANCES

Experiences

- I am a Full-Stack Web Developer with practical experience in building responsive, scalable, and dynamic web applications. I have strong expertise in front-end development using React, along with a solid understanding of back-end development concepts required to design and implement complete full-stack systems.
- In addition, I am also a Mobile Application Developer using Flutter and Dart, where I develop cross-platform applications for both Android and iOS. I focus on creating modern, efficient, and user-friendly interfaces while ensuring smooth performance and good user experience across devices.

Projects

- AI-Powered Online Coding Courses Platform
Developed an online programming tutorial website with AI-powered features to enhance the learning experience. The platform provides structured coding courses with a responsive and user-friendly interface.
- Bike & E-Scooter Rental Management System
Built a system for managing bike and e-scooter rentals, allowing users to book and manage rentals efficiently with features for tracking availability and handling operations.
- Proctor Work System in Universities
Developed an online system that connects students with proctors, enabling real-time communication to quickly report and resolve dormitary and other issues for faster support and coordination.
